

Claims 1-10 are cancelled.

11. (new) A module to be received in a frame for cable entries and/or pipe penetrations, the module comprising parts adaptable to receive flat cables and/or pipes having an elongated cross section.

12. (new) The module of claim 11, wherein the module is formed of two end parts and two middle parts.

13. (new) The module of claim 12, wherein each end part has a number of sheets, giving a rounded form to receive an end of the flat cable and/or the flat pipe, and which sheets may be peeled off to adapt the end part to the received flat cable or the flat pipe.

14. (new) The module of claim 12, wherein the end parts are identical to parts forming a module for cables and/or pipes having a circular cross section.

15. (new) The module of claim 12, wherein each middle part is formed of a base plate and a number of sheets that may be peeled off to adapt the middle part to the flat cable or the flat pipe to be received.

16. (new) The module of claim 15, wherein the base plate is to be directed away from the flat cable or the flat pipe at mounting in a frame.

17. (new) The module of claim 11, wherein the module is made of an elastic material.

18. (new) The module of claim 12, wherein a blind plate is arranged encircled by the end and middle parts.

19. (new) A frame for cable entries, pipe penetrations or the like, wherein the frame receives one or more modules according to claim 11.

20. (new) The frame of claim 19, wherein the frame has a wedge or other tensioning means.
